## 设备介绍 Equipment Introduction

奇多粟米条是一种特殊的挤压型小食品，嚼在嘴里非常脆。玉米糝与一定比例的水分混合后进入旋转头挤压机中，在挤压机两个转盘的挤压与揉搓作用下，玉米糝形成不规则的扭曲形状，然后切刀将其切成所需长度的产品。奇多可以油炸后调味，也可烘烤后调味，因其美味而深受消费者欢迎。

Kurkure/ Cheetos are kind of special extruded snacks, very crunchy and delicious in taste. They are made by a special extrusion process. The corn grits are moisturized by water in the flour mixer and fed to the rotary head extruder. In the extruder, due to the rubbing of two rotary plates, the corn grits are squeezed and twisted to curls shapes. The cutting knives can cut them into required length. The Kurkure/ Cheetos can be fried in fryer or toasted in oven and then cooled before flavoring. Seasoning is sprayed onto their surface to get different delicious tastes. Due to their delicious tastes and nutrition, they are quite popular with consumers.
