

SMALL BISCUIT PROCESS LINE

小型饼干生产线

1 和面机 Dough Maker

2 复合压延成型机 Compound Rolling and Shaping Machine

3 烘烤箱 Oven

4 喷油机 Oil Sprayer

5 冷却机 Cooling Machine

设备介绍 Equipment Introduction

在吸收日本技术基础上自主开发的全自动饼干生产线，设备设计新颖，结构紧凑，自动化程度高，从进料，轧制、饼干成型、废料回收、干燥、涂层、冷却一次性完成。本公司为用户提供数百种模具和数十种工艺配方。通过改变模具和工艺配方可生产市场流行的高端饼干，如奶油饼干、曲奇、薄饼干、苏打饼干、动物饼干、蔬菜饼干等。

The full automatic biscuit production line, developed independently by absorbing Japanese technology, has a novel design, compact structure and high degree of automation, from feeding, rolling, biscuit forming, waste recycling, drying, coating and cooling all at once. The Loyal company provides hundreds of molds and dozens of recipes for users. By changing the molds and recipes, it can produce popular high-end biscuits such as cream biscuits, cookies, thin biscuits, soda biscuits, animal biscuits, vegetables biscuit etc.

技术参数 Technical Parameter

型号 Item No.	产能 Capacity (kg/h)	加热方式 Heating Type
LY-25-I	40-50kg/h	Electricity, Gas, Diesel 电力、燃气、柴油
LY-25-II	50-100kg/h	Electricity, Gas, Diesel 电力、燃气、柴油
LY-320	100-150kg/h	Electricity, Gas, Diesel 电力、燃气、柴油

We can design it according to the customer needs and requirements.
